

MIT Living Groups Show Off at Midway

Simmons Starts Recruiting One Year Early; Panhellenic Association Takes More Booths

The last Residence Midway of its kind gave the Class of 2005 a first glimpse at MIT's large array of living options.

The Midway, which was held last night in Johnson Athletic Center, featured all of MIT's FSILGs, and every dorm except for Bexley Hall.

"It's a little overwhelming, but it's exciting at the same time," said Isaac B. Taylor '05.

East Campus' booth featured a variety of eccentric costumes, and upperclassmen offered freshmen a ride in a dentist's chair.

Despite this bizarre display, some freshmen were impressed. "I've been hearing rumors that EC is pretty weird," said David C. Wang '05, "but they seem like pretty cool people."

Simmons Hall also made an appearance at the Midway, though it is not scheduled to be completed until August 2002. Members of

Dan Ramage '04 (left) and Ankur Mehta '03 offer information about Simmons Hall, a dorm that is currently under construction, during yesterday's Residence Midway in Johnson.

"The Sponge Committee," a group of students who plan to move to Simmons Hall next year, distributed a pamphlet which described the dorm's advantages and facilities.

"We have a booth because when the dorm opens, it's not going to be an all-freshmen dorm, and we want upperclassmen to move in," said Daniel R. Ramage '04. Ramage told

a freshman that the best thing about Simmons was that "it's got holes in it."

Panhel gets more booths

The Panhellenic Association had four booth spaces at this year's Midway, a significant increase from last year, when the five sororities shared a single booth.

"In the past, [the Residence Midway] has been more useful to guys," said Panhellenic Vice President of Recruitment Ariya Dararutana '03. "We're hoping to have a larger presence this year."

Mackenzie L. Duelle '05 said the Midway was male-heavy, "but I don't really care that much."

"Tonight is guy-oriented, but I think it will equalize after tomorrow, when the sororities talk to us," said Lynn K. Kamimoto '05.

Dararutana said that Panhellenic sororities conduct rush together, in accordance with national Panhel-

Activist's Speech Covers Sexual Attitudes, Rape

Koestner Shares Own Story, Attacks Sexist Humor

By Brett Altschul
STAFF REPORTER

On Friday morning, freshmen and transfer students gathered in Kresge Auditorium to hear Katie Koestner, an activist and date rape victim, speak about sexual attitudes and rape.

A woman who has been raped needs three kinds of help, Koestner said: medical, which must occur within three days of the rape if evidence is to be collected; legal; and counseling.

Koestner proceeded to talk in detail about her own rape, which occurred during her first semester at William and Mary College. On her first serious date in college, her boyfriend pressured her to have sex and raped her when she refused.

She discussed the important role played by a rape victim's friends and family — providing direct support and help in getting professional assistance.

In her case, Koestner said, she got little support. She was vilified on the William and Mary campus for speaking out against the wealthy, popular man who raped her. At the same time, she was alienated from her father, who disapproved of her behavior in the events leading up to the rape.

Koestner called on all the men in the audience to "stand up in the middle of MIT and say, 'Rape is

wrong."

"It's really because of you men that I'm here today," she said. "While not all men are rapists, most rapists are men."

She attacked sexist humor and other insensitive behavior she had seen in men across the United States. With these things going on, how can men develop the "respect for women that they need in order to build a world without rape?" she asked.

Activist Faces Audience Questions

After her presentation, Koestner took questions from the audience. The first questioner directed his question to the men in the audience, asking them to immediately stand and denounce rape, as Koestner had suggested.

Nearly all the men in Kresge did stand, to thunderous applause from the women in the audience. Koestner thanked the men and admonished them to continue opposition to an atmosphere tolerant of date rape.

Another questioner asked Koestner about how she would suggest dealing with situations similar to that faced by Julia M. Carpenter '03, who took her own life after Institute authorities failed to properly respond to a harassment complaint she filed.

Navigating Institute Phone Network, Distance Calling

By Alice S. Wang
STAFF REPORTER

To the freshman navigating the jungle of MIT's campus, anything and everything can seem to glow with mystery and fascination — from the Greek letters that overhang fraternity houses to the oddly-shaped auditorium that is Kresge. The first-year student may be just itching to dial home and brag to parents and younger siblings.

But how?

When a new undergraduate may not even know his own phone number, conquering the Institute phone system may seem out-of-reach.

Not to worry; with a little guidance, all freshmen should be well on their way to conquering MIT itself, or at least being able to tell their little brothers that they did.

Campus numbering system

If one is on campus, it is necessary to dial only the last five digits to reach another number on campus. To call outside campus but within the "617" area code, press "9," then "617," and then the seven-digit number.

In the case that your dorm telephone number slips your mind, there's no need to walk all the way downstairs to the front desk. Simply dial "9400" on any campus phone to get the number from which you are dialing.

What if you meet someone

during Orientation who lives three floors down from you, but you've lost his number?

In many of MIT's dormitories, a room's number and its telephone number are related. To determine the former from the latter, simply learn to recognize the pattern in each dorm's system.

In Baker House, for example, the five-digit extension always begins with a "57." If the resident lives on

IFC Rules Confuse Freshmen

Residence selection can be a confusing and overwhelming process for incoming students which is only compounded by the many rush rules that govern FSILGs.

For example, a FSILG member may not speak to a freshman prior to the residence midway. The 2001 Interfraternity Council rush rules state that "conversing with freshmen shall not be allowed between the end of Summer Rush and the Beginning of Rush Week..."

Once rush has begun, FSILGs must follow a set of complicated procedures for checking freshmen out of the clearinghouse system.

Many freshmen do not understand these rules. "Some of [the rules] are ridiculous," said Haiming Sun '05. "I mean we're supposed to get as much information as we can," he said, "but we can't if no one can tell us anything."

Other freshmen echoed Sun's sentiments. "I really don't like the rules," said Mitun Ranka '05. "I mean it's like they're trying to push us into dorms."

Rush rules to ensure fairness

IFC Rush Chair Joanne Chang '03 said that the rush rules are intended to "make sure that everyone has the same opportunity as everyone else. They're to ensure that everyone starts on an equal footing."

Astronomers Claim Asteroid Is Largest on Record

THE BALTIMORE SUN

For 200 years the giant asteroid Ceres has held the title as the largest known "minor planet" in the solar system.

Ceres is a spherical space rock orbiting in the asteroid belt between Mars and Jupiter. It is nearly 600 miles in diameter, roughly the distance from Baltimore to Chicago.

Now a team of European astronomers is claiming that Ceres has been eclipsed in size by a newly discovered object, found near the orbit of Pluto.

The new asteroid could be as big as 870 miles across, according to calculations by a team led by Gerhard Hahn, of the German Aerospace Center in Berlin.

The team's news release called the data "decisive relegating [Ceres] to second place after holding the asteroid size record for 200 years."

Not so fast, said Brian Marsden, director of the International Astronomical Union's Minor Planet Center. He said an asteroid's size can't be determined precisely without first knowing both its distance and its brightness, or reflectivity — also called its "albedo."

The Europeans have determined the object's orbit and distance, he said. But, he added, "It's a little premature for them to boldly come along and give a size, when they're still assuming an albedo. More precise observations are needed."

Bush Offers First Comments on Missing Intern Chandra Levy

LOS ANGELES TIMES

CRAWFORD, TEXAS

Breaking a months-long silence on the case, George W. Bush on Friday expressed his sympathy for the family of missing Washington, D.C., intern Chandra Levy and said he hopes that "the Levy (family) prayers are answered."

"This isn't about a congressman," Bush added, referring to Rep. Gary Condit, D-Calif., who has admitted to a "very close" relationship with the Modesto, Calif., woman before she mysteriously vanished in Washington in April.

"This is about a family who lost a daughter, and that's what I'm concerned about," the president said during a news conference here.

"And I hope that if she is alive, she's returned soon. And I pray she's alive. That's what — that's where my heart is, and that's where my concerns are on this issue," Bush continued.

Russia Downplays ABM Remarks

THE WASHINGTON POST

MOSCOW

Russian officials reacted mildly Friday to George W. Bush's bluntest statement yet that the United States will scrap a 30-year-old arms control treaty "on our timetable" in order to test a national missile defense system.

The Foreign Ministry simply said talks about the future of the treaty have been useful, and bilateral ties between the two countries have improved since Bush met with President Putin in June and July.

Foreign Minister Igor Ivanov, in the latest of a series of high-level consultations, made an implicit pitch for Russia's proposal for deep cuts in the number of strategic warheads. In a meeting with John R. Bolton, undersecretary of state for arms control and international security, Ivanov reminded Bolton that Bush and Putin had agreed that the issues of missile defense and weapons cuts were "inseparably connected," a ministry statement said.

Bush's comments Thursday were the strongest suggestion yet that the United States will jettison the agreement despite Russia's objections.

Showers Decide to Wait Out Rush

By Tao Yue

ASSOCIATE NIGHT EDITOR

Murphy's Law states that rain will come whenever an important event is held outdoors. Four years ago, that happened to the Class of 2001. Killian Kickoff was moved from its namesake location and moved to Johnson Athletic Center, where carefully prepared speeches and attention-grabbing stunts were set aside. The Dormcon president's speech, in fact, was abridged to two sentences.

The next three years fortunately saw no repeat of that. Killian Kickoff was favored with ideal conditions: moderate temperatures and blue skies.

It looks like today's event will see the same great weather. Clouds will be moving in later, with showers and thunderstorms possible. These won't arrive until Tuesday, after the bulk of scheduled Rush activities have been completed.

If it rains, though, remember who to blame: that proverbial butterfly who flapped its wings weeks ago in Beijing. Remember: it was at MIT that chaos was first observed in computerized models of weather.

Today: Mostly sunny. High in the mid 70s °F (23 to 25 °C). Northeast wind 5 to 10 mph (8 to 16 kph) becoming southeast late.

Tonight: Clear. Low in the mid 50s.

Tomorrow: Mostly sunny. High in the lower 80s.

Monday: Mostly cloudy with a chance of showers and thunderstorms. High in the lower 80s °F (27 to 29 °C).

Firestone Settles Suit, Pays Texas Family \$7.5 Million

By Caroline E. Mayer and Frank Swoboda

THE WASHINGTON POST

Bridgestone/Firestone Inc. agreed Friday to pay \$7.5 million to settle a lawsuit by the family of a Texas woman left paralyzed and brain damaged when a tread separated on a tire of her Ford Explorer, causing it to roll over.

The settlement was worked out in a brief morning meeting as a nine-member federal jury in McAllen, Texas, was entering its fourth day of deliberations. It avoided the first jury verdict against the tiremaker since the start of a massive recall of Firestone tires a year ago.

Attorneys for both sides met with the jury after the settlement was announced and said its members were not close to reaching a verdict. "They told us they still had a lot of work to do," one of the lawyers said.

Lead Firestone counsel Knox Nunnally said that as a result of this case he expected the majority of the remaining lawsuits against the tiremaker to be settled on an "amicable

basis." The Rodriguez case was one of more than 200 cases that Firestone has settled. In addition, there is a major class-action lawsuit in Indianapolis, which is still far from going to trial.

While both sides claimed victory, the stakes were much higher for Firestone. The company had gambled its future during the two-week trial by trying to persuade the jury to assess at least part of the blame on Ford Motor Co. for the more than 200 deaths and 700 injuries attributed to the tire failures.

Most of the Firestone tires at issue were used as original equipment on the Ford Explorer sport-utility vehicle. Ford settled with the Rodriguez family for \$6 million before the trial started.

Firestone said it was glad it was able to reach agreement with the family of the injured woman, Marisa Rodriguez, a 39-year-old mother of three young children. "Since the outset, when we provided financial assistance to help with the family's medical bills, we have been hopeful that we could reach a fair settlement that would also bring closure to them following the acci-

dent," the company said in a prepared statement.

Sources said the \$7.5 million settlement was in addition to \$350,000 in expenses Firestone already has paid for Rodriguez's medical care.

As the jury deliberations wore on, sources said each side became worried about the possible verdict — particularly after the jury asked for the maintenance records for the Rodriguez's 1998 Explorer. The records hadn't been entered into evidence, but each side interpreted the request as a sign of just how serious the jury was about assessing blame.

Firestone has been trying to convince federal safety regulators and the public that the tread-related accidents are at least partly due to the design of the Explorer. The automaker has consistently denied any blame, insisting the accidents were strictly the result of a tire problem.

U.S. District Court Judge Filemon Vela had instructed the jury that if it found Firestone at fault, it also had to determine how much blame, if any, was attributable to Ford.

New Judge Assigned to Hear Remainder of Microsoft Case

By Jonathan Krim and Carrie Johnson

THE WASHINGTON POST

WASHINGTON

A new judge was assigned to the Microsoft antitrust case Friday, opening what could be the final chapter in one of the most contentious, highly publicized and important antitrust litigations in a generation.

U.S. District Judge Colleen Kollar-Kotelly will hear the remaining parts of the four-year-old case and determine what penalties will be imposed on the Redmond, Wash., software giant. Unless the case is settled, her ruling could help shape how antitrust law will be applied in the rapidly changing marketplace of high technology.

Kollar-Kotelly, 58, replaces fellow District Judge Thomas Penfield Jackson, who was thrown off the

case by a federal appeals court in June.

The appeals court ruled that Jackson, who presided over the trial, made improper and biased comments about the case to the media and failed to hold separate hearings before ordering that the company be broken in two.

But although it excoriated Jackson for his conduct and threw out his breakup order, the appeals court upheld many of his conclusions that Microsoft illegally abused its monopoly over personal-computer operating systems.

It will now be up to Kollar-Kotelly to set the pace for the next phase of the case. Although she has little experience presiding over antitrust cases, she has a reputation as a no-nonsense, efficient trial judge who almost never speaks to the news media.

State and federal prosecutors

want to push ahead as rapidly as possible. They have argued that failure to quickly rectify Microsoft's anti-competitive conduct damages the public interest and are particularly concerned about the imminent launch of Microsoft's new operating system, Windows XP, which they believe repeats some of the conduct that sparked the original case.

But at almost the same moment that Kollar-Kotelly was assigned to the case, Microsoft was releasing its final, "gold" version of XP to computer manufacturers in a splashy ceremony at its Redmond headquarters. PC makers will now install and test the software on new machines, a process that usually takes about a month, and then are free to ship them to be sold via stores, catalogues or online. The software will be available in stores on Oct. 25.

Retired Air Force Sergeant Regan Accused of Stealing Secret Data

By Robert L. Jackson

LOS ANGELES TIMES

WASHINGTON

A retired Air Force master sergeant working for a government contractor was charged with conspiring to commit espionage Friday for stealing classified data from a super-secret federal agency that designs and operates the nation's spy satellites.

Brian P. Regan, 38, did not immediately respond to the charges during an appearance in U.S. District Court in nearby Alexandria, Va., a day after his arrest by FBI agents as he attempted to board a flight for Europe. He was held without bond pending another court hearing next week.

U.S. Magistrate Judge Welton Sewell said he would appoint an attorney for Regan after the defendant said he had no lawyer. Regan, who was not handcuffed, was dressed casually in a striped polo

short and dark green slacks.

Prosecutors would not disclose the country for which Regan allegedly conspired to spy, although sources said it was not Russia. Nor did prosecutors allege any motive for espionage except to say Regan had accumulated consumer debts of \$53,000.

Law enforcement sources who requested anonymity said initial assessment indicate the damage allegedly caused by Regan was far less extensive than that caused by FBI spy Robert P. Hanssen, who confessed last month that he spied for Russia for nearly 20 years in return for \$1.4 million in cash, diamonds and Rolex watches.

Hanssen provided Moscow with information about U.S. early warning systems, satellites, nuclear defenses and communications intelligence. He also confirmed the identity of some Russian agents working for the United States.

Regan, according to a 21-page affidavit filed in court, chiefly stole computer documents from the National Reconnaissance Office, where he worked. The documents were labeled "secret," which is not the highest classification, and dealt with electronic images from overhead satellites, classified pages from a CIA newsletter, and portions of a CIA intelligence report, according to FBI agent Steven A. Carr.

Other purloined documents, Carr's affidavit said, related to "a foreign country's satellite capability" and the "unclassified" table of contents for an otherwise "top secret" intelligence manual.

Authorities, however, were not minimizing Regan's alleged criminality, especially in view of his 20-year Air Force career, including an award for distinguished service as an intelligence analyst following the 1990 Iraqi invasion of Kuwait.

FBI's Controversial 'Carnivore' May Soon Expand, Says Group

By Robert O'Harrow Jr.

THE WASHINGTON POST

WASHINGTON

Federal law enforcement authorities may soon expand the use of a controversial FBI monitoring system to capture e-mail and other text messages sent through wireless telephone carriers, as well as messages from their Internet service providers, according to a telecommunications industry group.

The FBI has been using the system, called Carnivore, for two years, subject to court authorization, to tap into Internet communications, identify e-mail writers online or record the contents of messages. It does so by capturing "packets" of information containing those details.

Civil liberties advocates and some lawmakers have expressed concerns because the system could scan private communication about legal activities of others besides those under investigation. The Justice Department is reviewing the system's impact on privacy.

Now the Cellular Telecommunications & Internet Association is warning that authorities could use Carnivore as soon as October to examine messages such as those sent by cellular telephones and other handheld devices. That's because

the industry has been unable to come up with a way to give law enforcement agencies the ability to monitor digital communications as they can the more easily captured analog messages, as required by a 1994 law.

In an Aug. 15 letter to the Federal Communications Commission, Michael Altschul, the association's senior vice president and general counsel, said its members can't meet the Sept. 30 deadline for the technology.

Altschul said in an interview that the FBI has told industry officials it would use Carnivore in the absence of another system. "It could well be a huge expansion of the use of Carnivore," he said.

The FBI said in a prepared statement Thursday: "We have never proposed or planned to have Carnivore used as a solution for ... compliance." A spokesman said Internet service providers are now so adept at meeting the technical demands of approved surveillance of suspects' Internet traffic that the FBI has used Carnivore only twice this year.

The spokesman declined to say whether the FBI would use Carnivore — now known in the agency as DCS1000 — to capture communications handled by telephone car-

riers.

Privacy advocates agreed with Altschul that the industry's technical problems could mean an expansion of Carnivore use. David Sobel, general counsel of the Electronic Privacy Information Center, said the FBI has not demonstrated that it can narrowly target the system. That raises the prospect that it will collect information from many people's communications while searching for a suspect's communications.

"It opens the door to the collection of communications of people who aren't even named in (court) orders," Sobel said.

Law enforcement agencies use two legal methods to collect information about suspects' communications. Under federal "pen register" procedures, authorities need only say that call information is relevant to an investigation to get court permission to obtain the origin or destination of electronic communication to and from a suspect. Those rules do not allow authorities to capture the content of communication.

But Sobel and Altschul said Carnivore cannot separate address information from the content of a message in a packet, and so authorities must be trusted to weed out data they are not allowed by law to have.

Palestinians Drop Bid for Resolution Condemning Israel

THE WASHINGTON POST

UNITED NATIONS

The Palestinians Friday dropped their bid for a U.N. resolution condemning Israel after failing to muster sufficient support in the 15-nation Security Council.

The decision was a significant diplomatic setback for the Palestinians because they were unable to secure the unanimous backing of a key bloc, the seven council members from the movement of non-aligned nations, that traditionally has supported Palestinian positions in the council.

In addition to condemning Israel, the resolution called for an unspecified "monitoring mechanism" to cool the violence that has taken the lives of more than 530 Palestinians and nearly 150 Israelis since late September.

Nasser Kidwa, the Palestinian representative at the United Nations, said Friday he was withdrawing the proposal because it faced a second U.S. veto. In March, the United States vetoed a previous Palestinian resolution calling for international observers in the West Bank and Gaza, an idea Israel has strenuously opposed.

Kidwa said, however, that the Palestinians would continue to press for international condemnation of Israel at a global conference on racism in Durban, South Africa, later this month.

"A vote in the Security Council on our draft resolution is not going to achieve a much better result than the vote which took place in March," Kidwa said. "We think it would be more appropriate not to proceed immediately."

Software Bugs Cause Problems With Med School Applications

LOS ANGELES TIMES

More than 30,000 of the most hard-driving students in America now have an extra reason for heart palpitations: near-collapse of a computer system that distributes their applications to medical school.

And with life decisions at stake, applicants who have been striving for straight A's since middle school are not taking the technological betrayal lightly.

"You couldn't pick a worse group of people to throw a bombshell in the middle of," said Richard Silverman, director of admissions at Yale University School of Medicine.

In a move that was supposed to speed decision-making, the clearinghouse for the first time this year asked students to file their applications online. But a series of software bugs has nearly crippled its efforts to process applications for the 16,000 medical school slots available for the 2002 academic year.

"It's just a black hole," lamented James Chen, 24, of Los Angeles, whose online application was submitted in June but still hasn't reached his more than 25 prospective schools. "We're all just super-frustrated. I never expected it to culminate in this."

The breakdowns mean delays of several weeks or more in applications and admissions. And they have set off a scramble among many students to apply to their top-choice schools directly, before someone else grabs their slot.

Privately Funded Researcher to Create New Stem-Cell Lines

LOS ANGELES TIMES

WASHINGTON

A privately funded Harvard University researcher soon will begin creating stem-cell lines for himself and other academic researchers from discarded embryos provided by a large Boston fertility clinic, an arrangement that dramatically could enhance the supply of cells available for study.

But research on these cells could not be conducted using federal money, as these cell lines would be established subsequent to the 60 lines identified by the National Institutes of Health and allowed under President Bush's recent decision.

The deal — unusual in that most privately funded stem-cell lines are created by companies for commercial purposes — could serve as a catalyst for other private interests to support academic researchers who otherwise are largely dependent on federal grants. In addition, because these stem-cell lines would be new, they could be more valuable to researchers than the existing lines, whose age and viability have not been disclosed.

The arrangement, first reported in Friday's Boston Globe, was not "a response to President Bush's thinking and decision," said Douglas Melton, chairman of Harvard's cell and molecular biology department.

In an interview Friday, Melton said he first drafted the proposal more than a year ago and sought approval from his employer, the Howard Hughes Medical Institute.

Taiwan Panel's Review Signals Pressure for Trade with China

LOS ANGELES TIMES

TAIPEI, TAIWAN

A high-level Taiwanese panel began a three-day review of the island's economic future Friday amid signs that its government is about to abandon increasingly futile efforts to limit commercial ties with mainland China.

The meeting, which unfolds as Taiwan appears to be heading for its first recession in more than three decades, was called by President Chen Shui-bian to explore ways of reinvigorating what only a year ago was viewed as one of East Asia's most vibrant economies. But interest has focused on the government's restraints of trade ties across the Taiwan Strait — policies viewed by a growing number of analysts as outdated, ineffective and damaging to the island's future.

Sources following the debate believe that the panel of business and political leaders will urge an immediate easing of restrictions on trade with and investment in mainland China. Chen has pledged to implement recommendations of the panel.

Bush's Pick for Top Military Post Reflects His Pentagon Priorities

By Craig Gordon

NEWSDAY

WASHINGTON

President Bush's choice for the United States' top military officer, Air Force Gen. Richard Myers, comes with hands-on experience with the president's key Pentagon priorities: space-based defense, the Asian theater and a sweeping but troubled military restructuring.

Bush nominated Myers to be chairman of the Joint Chiefs of Staff, calling him "the right man to preserve the best traditions of our armed forces while challenging them to innovate to meet the threats of the future."

Myers, 59, went from a childhood fear of airplanes to flying combat missions over Vietnam, and most recently was vice chairman of the Joint Chiefs. He also has commanded U.S. forces in the Pacific, and he headed the Air Force Space Command until last year.

In that post, Myers became an expert in computer and space warfare, leading some analysts to say his choice reaffirms Bush's commitment to press ahead with a missile-

defense system, even as Democrats in Congress, European allies and some inside the Pentagon question its need, cost and effectiveness.

That issue is likely to be one of the most contentious facing Myers, but several analysts also said they believed he would use a self-effacing, level-headed demeanor to smooth differences inside the Pentagon and out.

"I think Myers is a pragmatic choice. I think he's for reform, but I don't think he's going to upset the apple cart," said Ivan Eland, director of defense policy studies at the Cato Institute, a Washington think tank. "He's very pragmatic and realistic about what missile defense can do. You don't get up that high in the hierarchy by having rabid, radical views."

In another controversial area, Myers is working on a major strategic reassessment of America's military in the post-Cold War era, ordered by Defense Secretary Donald Rumsfeld and due next month. Rumsfeld has talked of the need for a smaller and more rapidly deployable fighting force, but that,

too, has run into strong opposition in the Pentagon and on Capitol Hill, where some already are lining up to oppose possible base closings.

Several analysts said Myers' experience in the Pacific fits well with the Bush administration's increased focus on threats in the region, particularly from China and North Korea.

"The experiences that he's had cut across all of the priorities which the administration seems to have enunciated in the eight months it's been in office," said Dan Smith, chief of research for the Center for Defense Information, a military affairs think tank.

At a news conference in Crawford, Texas, where Bush is vacationing at his ranch, Myers said he was "eager to get back to work to building the kind of military that President Bush envisions."

If confirmed by the Senate, Myers will replace Army Gen. Henry Shelton, who steps down Sept. 30. Myers would be the first Air Force officer to head the Joint Chiefs in almost 20 years.

Militant Utah Polygamist Sentenced To Five Years in Jail, Fine Imposed

By Julie Cart

LOS ANGELES TIMES

DENVER

A Utah polygamist who all but dared prosecutors to arrest him was sentenced to five years in prison Friday on felony bigamy charges, while his five wives and some of his 30 children wept in the courtroom.

Tom Green, 53, also was ordered to pay \$78,000 to the state in restitution for welfare payments to his 25 children under 18.

The case was the first prosecution of a polygamist in Utah in 50 years and has focused an uncommon spotlight on plural marriage in the state.

Green was silent as Judge Guy Burningham announced the sentence on four counts of bigamy and one count of criminal nonsupport of a child. He was sentenced to five years

on each count, but the judge ordered the sentences to be served concurrently. Prosecutor David Leavitt had asked for a 10-year sentence.

Green testified for an hour Friday and remained defiant about what he considers to be his religious beliefs. After asking his wives and seven of their children to stand in the courtroom, he pointed and said: "I am not ashamed of these people, and I'm not ashamed of my relationship with them."

Each of his wives, whom he married as teen-agers, took the stand and asked for leniency. In letters to the judge, they pleaded with the court to consider the effect Green's imprisonment would have on his family and its ability to take care of itself.

"Tom's children are very close to him," Linda Green wrote. "I

believe they would suffer emotionally and mentally by his being taken away. I worry that our children will learn to disrespect government for generations to come because of having their father sent to prison for his religious beliefs."

The courtroom in Provo was filled with a smattering of polygamists supporting Green and a small group of anti-polygamist activists. In his arguments, Leavitt spoke about the history of polygamy in Utah. Once a tenet of the Mormon religion, it was outlawed by the church in 1890.

Leavitt, who is the brother of Utah Gov. Mike Leavitt and himself a descendant of polygamists, received death threats during the trial. After Friday's hearing, he said that Green had not been singled out.

Letters To The Editor

A Progressive's Progress

Daniel Tortorice raises some valid points in his article ["The Real Progress of the Progressive Movement," August 22] about progressives seeming short-sighted with regard to the plight of developing countries, but his plausible-sounding abstract arguments do not square with reality. For anyone interested in examining the facts, I highly recommend *No Logo* by Naomi Klein. She outlines the deep changes in many Western multinationals during the 1990s, such as globalization, and actually visited and talked to workers in the Third World.

The first "myth" Tortorice defends is that minimum wage and other labor laws will drive up the prices of goods manufactured in developing nations. However, wholesale outsourcing of manufacturing from developed countries to third world "export processing zones" has immensely reduced labor costs — and increased corporate profits and marketing budgets. Increasing third world wages will have a very small effect on corporate bottom lines, and would mainly decrease profits and

marketing expenditures. Even in the United States, minimum-wage hikes are barely noticeable in terms of employment or inflation.

Another "myth" he maintains is that "free trade" is indeed beneficial for third-world workers: it provides them a new option, and why would they choose it if they didn't want it? There is much truth in this logic, but too often this degenerates into a mindless defense of the status quo. Remember that people can be coerced; they can be lied to; they can be desperate and take any job that comes along for fear of starvation; they can be forced out of school and sent to a sweatshop by their family.

Let us dare to ask the 16-year-old Filipino girls who manufacture our Nikes, rather than blithely declaring that all is right with the world. Klein did this, and was met with outrage when she suggested the rural migrant factory workers preferred this life to farming. They explained to her how many of their families were forced off their land (which they were never allowed to own) by "development" (such as golf courses, export processing zones), and therefore had to go wherever work was available. They described the lies about

high wages they were told by recruiters from the factories — much like the promises made about Manila's sex trade.

These workers want some other small things, such as democracy, unions, the right to strike, enforcement of labor and environment standards. Such denials of what we now consider basic rights, rather than people's free choice, are largely responsible for the miserable conditions much of the third world faces. In order to benefit from industrialization, American and European workers had to struggle and not meekly accept their lot. Change finally occurred through unions, government action, strikes, journalistic muckraking, public outrage, boycotts and other progressive action — precisely the tools workers in the Third World are trying to wield.

We should never rely on soothing platitudes to explain complex and painful human situations. We should open our eyes to the facts of globalization, and our ears to what people of developing countries are trying to say. We should hear echoes of our own history in the emerging struggles of third world workers for a better life; and as then, we should act.

Opinion Policy

Editorials are the official opinion of *The Tech*. They are written by the editorial board, which consists of the chairman, editor in chief, managing editor, executive editor, news editors, features editor, and opinion editors.

Dissents are the opinions of the signed members of the editorial board choosing to publish their disagreement with the editorial.

Columns and editorial cartoons are written by individuals and represent the opinion of the author, not necessarily that of the newspaper.

Letters to the editor are welcome. Electronic submissions are encouraged and should be sent to letters@the-tech.mit.edu. Hard copy submissions should be addressed to *The Tech*, P.O. Box 397029, Cambridge, Mass. 02139-7029, or sent by interdepartmental mail to Room W20-483. All submissions are due by 4:30 p.m.

two days before the date of publication.

Letters and cartoons must bear the authors' signatures, addresses, and phone numbers. Unsigned letters will not be accepted. No letter or cartoon will be printed anonymously without the express prior approval of *The Tech*. *The Tech* reserves the right to edit or condense letters; shorter letters will be given higher priority. Once submitted, all letters become property of *The Tech*, and will not be returned. *The Tech* makes no commitment to publish all the letters received.

Beware the Rogue State

Michael Borucke

We live in troubled times, indeed. With all of the nations that currently threaten the security of the United States, it's no wonder that we're spending half of the spendable federal funds — hundreds of billions of dollars — on defense. We have to be prepared in the event of an attack. Further, it's no wonder that the Department of Defense has such a close relationship with universities like MIT; nearly a quarter of MIT's funding comes from the Defense Department alone (as seen in *MIT Spotlight*). Where else can the government go to tap the human resources necessary to build up our defensive capabilities?

But who are these rogue nations that we are watching out for? Who is the enemy? And what is a "rogue nation" anyway? Well, a rogue nation does what it wants, even if that means going against the wishes of the rest of the world. A rogue state will frequently violate international law, and its actions are undeterred by punishment. Such nations include Iran, North Korea, Cuba, and Iraq, which is perhaps the most rogue nation on earth. You would think that after the Gulf War, Saddam Hussein and the Iraqi government would fall in line with the rest of the world. But as the following will demonstrate, Iraq continues to defy the largely unified voice of the rest of the world.

This past July, 55 of 56 countries signed a treaty which would open each country's biological weapons plants to international inspection. Iraq was the only nation that refused to sign the treaty, citing economic reasons. It is obvious that Saddam is being belligerent because he's developing biological weapons illegally.

Well, that same month, during a UN conference on global small-arms trading, Iraq vetoed a proposal to ban arms sales to guerrilla groups that are wreaking havoc in

Africa. Being the world's largest exporter of small arms, it is plain to see why Iraq would want to maintain a large arms market in Africa.

In contrast to Iraq's dealings with African nations, its major military deals in Latin America have been with governments, not guerrilla groups. Last spring, Iraq lent the Columbian government more than a billion dollars in military aid. This, despite the fact that Columbia has the worst human rights record in the Western Hemisphere, despite evidence that the Columbian military and associated paramilitary forces have been responsible for a large majority of violations of international human rights law. As a small signal of the world's dissatisfaction with Iraq's continued neglect of human rights, Iraq was recently voted off the five-member UN Human Rights Commission.

You might hope Saddam would be somewhat kinder to the Iraqi people, but the government continues to enforce an embargo on imports of food and medicine. UNICEF reports that the embargo has caused the deaths of millions of children since the early nineties. Millions more are malnourished and sick for lack of adequate supplies. The embargo is a violation of international laws and has drawn worldwide criticism, but that by definition is irrelevant to rogue states like Iraq.

Likewise, the Shiite and Kurdish minority groups in Iraq continue to suffer under the government. Still, the Iraqi government has threatened to abstain from the upcoming UN Conference on racism if the subject of reparations is even brought up. Apparently, the government does not want to acknowledge the wrongs it has done to its minority population.

This trend of denying wrongdoing continues on a larger scale as the Iraqi government has recently expressed opposition to the formation of a permanent International Criminal Court. Previous UN courts have been created in an ad hoc fashion to try war crimes like

those perpetrated in Kosovo. The proposed court would be established permanently under authority of the United Nations and would prosecute only the worst war crimes including genocide and crimes against humanity. No doubt the resistance from Iraq stems from fears that government leaders may be prosecuted by this court.

Perhaps the most telling of Iraq's nefarious actions has been its desire to escalate an arms race through the destruction of an arms control treaty. The Iraqi government assures the world that its proposed new weapon system is strictly defensive. But why would they create a defensive system if they weren't already expecting a retaliatory action to some aggression on their part?

Finally, Iraq remains the only country in the world to reject a treaty that would reduce emissions of greenhouse gases to 1990 levels. The motivation behind this seems largely economic, as Iraq is an oil-producing country and would benefit if oil consumption were not regulated by the treaty. Still, the Kyoto Protocol represents an unprecedented effort to combat global warming.

Wait a second... that's not Iraq. It's the United States alone that refuses to ratify the Kyoto Treaty. Actually, it's been the United States all along. All right. My bad.

So the symmetry isn't perfect: Iraq might have a legitimate reason for a defense system, as they are currently being attacked by U.S. and British forces. The U.S., however, is being attacked by no one, so its call for a missile defense system is absurd at best. But the concept of a rogue state is useful in convincing the public that missile defense is needed. Further, it is true that minority groups in Iraq are directly oppressed by the Iraqi government, and only indirectly by the U.S. government. The analogy was meant more to reflect U.S. sentiment toward African-, Latin-, and Native Americans. But you get the idea.

Sage Advice

Jyoti Tibrewala

Freshman Orientation and Rush comprise two of the most fun weeks in all of the MIT academic calendar (oops, I don't think I was supposed to reveal that to the freshmen just yet; ah well, they were bound to learn it sooner or later). Free goodies, free food — and it's better than the usual fare — who can disagree?

But like all good things, R/O must come to an end. Once classes kick in, we'll have our heads buried in our books until all hours of the night. There is a way, though, to keep the fun alive. Just keep these few things in mind, and you can turn your years here into some of the best you'll ever have.

Get out of MIT at least once a week. It's important to give yourself a break once in a while, and a weekly basis is just the right frequency. After five days of classes, problem sets, and exams, you're going to want to forget about it all, and those two days each week are an opportunity to do just that. Explore Boston. It's

You don't want to get locked out of your room wearing a bathrobe or just a towel. Oh, and McCormick residents, we're not immune either.

right in your backyard, and the Harvard Bridge is only a 10-minute walk. If it's late, there's also SafeRide to get you around campus or between FSILGs on the other side of the river. And if there's somewhere else you want to go that's on the way, or even one that's a little off the route, talk to the SafeRide drivers; they're nice people. And then there's always the T. It's a little bit smaller than some other cities' metropolitan railways, but there's a good chance that your destination is within a reasonable distance from a train station.

Take the time to get to know people. This is one of the most important things to do here, and it applies to everyone. MIT is filled to the brim with interesting people. Freshmen, upperclassmen, graduate students, staff, faculty; everyone has something to offer. Don't get me wrong; academics are top priority. But in ten years, you're going to remember the friends you've made more than anything you've learned in class.

Shower daily. I know what you're thinking, but let me explain myself. I'm not going to lie to you. You may find yourself pulling many an all-nighter (to date, I haven't, but I have friends who have). But even if you're not sleeping every night, make a point of showering. Aside from the obvious benefits, it will give you a sense of pause in between the days. Also, take your clothes with you when you go to shower. You don't want to get locked out of your room wearing a bathrobe or just a towel, especially if you're in a co-ed dorm. Oh, and McCormick residents, we're not immune either. You'll come to learn how many males populate the McCormick lobby on a given day. Better to learn under more positive circumstances. Or, if you insist on only bringing a towel or robe, make sure you have your keys with you, especially if you live in East Campus.

Be careful when crossing Mass. Ave. Sure, it sounds simple enough, but any number of things can happen. First of all, don't cross in front of 77 when there are fast cars coming. If you start as soon as the signal turns to Walk, there should be no reason to run, but try to move faster than a snail. If you come out of 77 and the Walk sign is already there, and you're not sure how many chirps have passed, play it safe and wait for the next signal.

Own at least one pot or pan. Signing up for a meal plan is one thing that will definitely force you to learn how to cook. I don't care how bad a cook you think you are; there's no way I wasn't at least ten times worse than you a year ago. Aramark food is convenient around lunchtime — breakfast, too, if you're into that sort of thing — but you're going to want something different for dinner. Trust me. And Ramen Noodles are one of the basic food groups of college students. So make sure you have at least one pot or pan to cook them in.

I came to MIT last year with the same expectations and notions as many of you. But let me tell you that I had a blast. And I continue to do so as long as I keep certain suggestions in mind. I realize that I haven't given you any academic advice, but you'll get plenty of useful help on that from just about everyone else here.

Welcome to MIT. Good luck!

Be More Selfish

Matt Craighead

If there's one thing that everyone seems to agree on, it's that selfishness is evil and is the cause of many problems. Poverty, they claim, is caused by the selfishness of businessmen. Racism stems from white people who refuse to sacrifice their position of superiority, and environmental destruction from people too selfish and conceited to give up their cars.

Since you've likely already heard these exhortations to sacrifice and selflessness, I'd like to present to you the opposite view. I think you should be more selfish, not less, for your sake and for mine. You should look out for yourself first and foremost, not for others, not for your community, family, race, nation, or planet.

It's odd to need to take this side of the debate. After all, it's easy and rewarding to be selfish. (Note that I am referring to the idea of selfishness in its strictest sense: seeking one's own self-interest. I reject many of its false connotations, like boorishness, hedonism, or mindless obsession with money; these are certainly not in one's self-interest.)

In fact, it seems that it would be difficult to convince people to be unselfish. What argument could you make? If you link a supposedly unselfish action to some benefit down the road, that action is no longer unselfish! An example is the Christian concept of heaven; if you do "good deeds" (which happen to be unselfish) in life, Christianity claims, you will eventually receive a reward that compensates for all your earlier suffering.

The modern advocates of selflessness are far more sinister. Typically, they do not even attempt to link actions to benefits; instead, they link them to ideals. For example, they might insist that you donate to the poor in the name of "fraternity" or "compassion" or "equality." They claim that these ideals transcend any materialistic values, like self-inter-

est, and therefore they take precedence.

This is a dangerous road for you to tread. Remember that a valid concept must be linked to objects in reality. Yet your deceivers would tell you that you cannot grasp the importance of, say, equality on a "materialistic" level; instead, you must recognize its transcendent value as an ideal. Observe that this is a reli-

To decide whether an action is right or wrong, evaluate, using logic and reason, its consequences on yourself alone. If the action benefits you, it is proper; if it harms you, it is wrong.

gion, a religion where equality is a supernatural concept, pursued for its own sake, as an end in itself.

Once you believe that there is any idea which, by itself, can override all worldly concerns, you are in grave danger. Upholding that belief consistently requires following it in all cases, not just some. So, for example, if equality conflicted with your desires, you would be obliged to pursue equality, regardless of the cost. Likewise, if equality conflicted with someone else's life, liberty, or property, you would be compelled to take any means necessary, including murder, to ensure equality.

Pick any ideal; you will find that you must follow similar rules, no matter which one you place at the top. If you unconditionally uphold it, you will sacrifice yourself and everything you know.

So most practitioners of sacrifice do not insist that you uphold their ideals consistently, only when it is feasible or practical. But when you hold something as an ideal and fail

to practice it, you are condemned to Original Sin and a life of guilt. Although you know that you must fulfill your duty to that ideal regardless of the cost, you often pursue your self-interest instead. Any compromise or middle ground between selfishness and sacrifice is destined to failure, at the cost of your sanity.

I propose a simple alternative to this life of suffering and guilt. To decide whether an action is right or wrong, use logic and reason to deduce its consequences on yourself alone. If the action benefits you, it is proper; and if it harms you, it is wrong.

This standard is not as controversial as you might think, as I will illustrate by applying it in a less obvious way. If you were investigating two ways of building a machine, you would evaluate the advantages and disadvantages of each before choosing between the two possibilities. For example, you might say that one design is objectively good, i.e., it contributes to your values. You ought to recommend that your company build the better design, as wasting time on the other design would be wrong. That which is right promotes your life, and that which is wrong does not. Severing the connection between these ideas makes ethics inapplicable to life as we know it.

This standard is based on reality and not the supernatural; you can only decide what is in your self-interest by observing the world around you. Acting based on feeling or intuition alone will only harm you. This standard is very practical, as it never forces you to choose between the moral and the practical; they are the same. It is the quintessential American standard; what is "pursuit of happiness" besides seeking your own goals? It also leaves plenty of room for ideals that can be linked to reality and self-interest, such as justice, honesty, integrity, and productiveness.

So be more selfish. It's in your self-interest to do so.

Koestner Discusses Date Rape

Koestner, from Page 1

Koestner declined to answer the question, claiming lack of familiarity with Carpenter's case and insufficient expertise in dealing with cases that do not involve rape.

After the talk, the incoming students returned to their Orientation groups, and discussed their reactions to the talk over lunch.

Koestner an experienced crusader

Over the last decade Koestner has been a major figure in the movement to recognize date rape as a serious societal problem.

She was featured in the cover of *Time* in June 1991, and HBO produced a television movie about her rape and the subsequent events. Since she began speaking publicly about her experiences, Koestner has spoken to hundreds of thousands of students at over 800 institutions.

Next Year's Midway To Take New Form

lenic regulations. Members will not identify the groups they belong to until after this afternoon's Women's Convocation.

"It makes it easier for us," Dararutana said. "This way, our Rho Chis (Recruitment Counselors) can counsel all women [rushing], and it's easier for us to deal with inter-sorority disputes."

Next Midway will take new form

With next year's overhaul of the entire residence selection process, the current format of the Residence Midway may have to be rethought.

"In our discussions of rush 2002, the current plan is to have a Residence Midway," said Dormitory Council Rush Chair Jeffrey C. Roberts '02, "but will dorms participate? We haven't answered that question yet."

The current system of combining dormitories, fraternities, sororities, and independent living groups into

one Midway "puts all living groups on an equal footing," Roberts said.

Interfraternity Council Recruitment Chair Joanne Chang '03 said the Midway will still exist next year, "but it will be completely different. Students still need to know that there are other options, but they are no longer going to be living options."

Reactions to Midway vary

The Residence Midway "wasn't all that useful for me, but it's handy for people who have no idea where to go," said Delta Tau Delta President John C. Rondoni '02.

"It's pretty overwhelming, but it's a useful starting place," said Stephanie A. Claussen '05.

"It depends on the type of person you are," said Bryan D. Arbuszewski '05, who sat at a table in the center of the room, crossing out far-away fraternities. "I'm not one to talk until I know someone."

"I wasn't going to join a fraternity," Wang said, "but now, I might rush."

Professor Philip Khoury, Dean of the School of Humanities, Arts & Social Sciences, explains the importance of the HASS requirement to the class of 2005 at yesterday's Core Blitz in Kresge Auditorium.

Dorms Follow Fewer Rules Than Frats

Rush Rules, from Page 1

freshmen prior to the beginning of rush may have an advantage over houses who do not. "It would certainly be better for rush in general (to eliminate the restrictions on talking to freshmen), but not for every house," he said.

Although the current set of rules is quite complicated, Chang said that enforcement of the rules is based more on whether FSILGs display good conduct rather than the letter of the law. "There is a thing we call [the] 'spirit of rush...'" We're trying to make sure that every house has a clean and fair rush," she said.

However, Chang said that next year may give the IFC a chance to revise the rules, though they have remained relatively untouched for many years. "If you look at the rush rules from 1981, and you look at them now, there are few changes," she said.

Current rules may hinder rush

IFC President Rory P. Pfeiffer '02 said that the current rigid rules are only necessary because there is a lack of trust within the IFC. "I think the reason fairness is an issue is that there is a lack of trust. I wish that houses would trust each other more and be more of a community," he said.

Pfeiffer believes that the current rules may turn some freshmen off, and don't really change the outcome of rush. "The rules that people tend to bend and break aren't going to determine whether or not you get freshmen. There is enough diversity in the freshman class that every house should be able to get freshmen," he said.

Transfer student Eric Dominguez '04 was particularly annoyed by the rush rules, saying that they "produced a negative image of fraternities."

"The fraternities...ignore me because they're afraid of getting fined," he said. Still, the feelings were not universal.

"I like the room I stay in," said Yiuka Leung '05, "and I want to stay there."

"I don't plan on joining a sorority. I don't see the need for it," said Gul Gurkan '05.

Some rules change this year

Chang said that there have been several changes to the rush rules which pertain to freshman women. For example, it has become a rush violation to remove freshman women from Killian Kickoff. This is an attempt to raise attendance levels at women's convocation, which occurs later on in the day.

Another change is that freshman women won't be able to spend

nights at houses which don't house women during the year. This ensures that they will be available for overnights at all-female and coed ILGs.

Dorm rules less strict

Though not as stringent as those for FSILG's, dormitory rush rules are still built on the same principles of "fairness and not doing anything to mess up another's experience," according to Jeffrey C. Roberts '02, Dormitory Council Rush Chair.

"The rush rules for dorms are less strict and there's different enforcement," said Roberts, "especially since there are already freshmen temporarily living there."

The dorms simply do not operate on the same membership ideas as the FSILG's, said Roberts.

"Since not everyone in a dorm is required to take responsibility for the actions in their dorm's rush, enforcement is much more difficult," said Roberts.

Roberts also said that the very nature of dorm rush affects the rules of the game. "Dorms just want to present an image of the dorm to give freshmen a sense of choice, though ultimately the housing lottery has the final say," he said.

HOW TO USE THE BATHROOM.

You're probably saying

to yourself, any four-year-old knows how to use the bathroom. But you may not know that you use more water in the bathroom than anywhere else in your home. In fact, between the

toilet, the shower and the sink you can use up to 55 gallons a day.

You could end up using 30 to 60% less water by using a low-flow shower head.

Multiply that by the number of homes in the world, and

that's a lot of natural resources going down the drain.

Now, we're not saying you should stop taking showers or brushing your teeth. We're just suggesting some simple

bathroom training. For instance, when you're brushing your

teeth, turn off the water. Do the same when

you're shaving. And just because your shower sounds like an opera hall, don't feel the need to sing one.

Shorter songs make for shorter showers. And for the biggest culprit of them all, the toilet, try putting a weighted jug in the tank. It will help save water every time you flush. Plus, don't forget to turn out the lights when you leave. You'll be helping to conserve electricity.

Save up to 15% more water by installing a weighted jug in your toilet tank.

And oh yeah, if you don't think you'll remember these things, take

this newspaper with you the next time you go.

Options for Long Distance

Phones, from Page 1

floors 1 through 3, the extension ends with the room number. For residents on floors 4 through 6, the last three digits of the telephone number is the room number minus 250. Similar systems exist in all the Institute Houses.

At Burton-Connor, however, the telephone number does not correlate with the exact location of the room. All Burton-Connor telephone numbers are assigned in a consecutive fashion, from 5-8121 to 5-8489. Therefore, find a friend's number by adding to or subtracting from your extension the number of rooms between yours and the friend's room.

If all else fails, just try dialing "0" for MIT directory assistance.

Local and long-distance connections

If you live in on-campus housing and want long distance service with your MIT number, you have the option of using Campuslink or, well, Campuslink. While popular

alternatives include cellular phones and/or calling cards, Campuslink remains the sole MIT long-distance service provider.

To sign up online, visit <http://web.mit.edu/is/tel/campuslink.htm> or call 1-800-962-4772.

It is also possible to sign up for voice mail and Call Waiting services via Campuslink without using their long-distance service. To use Campuslink on campus, a PIN number is necessary to place direct-dialed calls. Campuslink also issues a calling card, so it's possible to call long distance for 15 cents per minute even when not in the room.

Campuslink's standard plan this fall is a 9.9 cent-per-minute rate to call anyone in the United States.

Alternate rates include a 3.9 cent-per-minute plan with a one-time charge of \$75.00 for the year, as well as a 2001-minute plan with a one-time charge of \$129.00 for the year.

daily Confusion

August 25

12 a.m.

12:00 a.m. – **New House** – Come on...it's late...eat more...I know you're hungry...pancakes (mmmm)...french toast (ahhh)...bacon and sausage (oh god)...smoothies (\$#&*)...

1 a.m.

1:00 a.m. – **New House** – We're still eating BREAKFAST at New House...maybe we'll just stay up all night...Come get some pancakes, french toast, bacon, sausages, and smoothies before we finish them off! After all, this is the only free food we'll be getting all year...

7 a.m.

7:00 a.m. – **Bexxxley Hall** – It's 7am. Good a time as any to go down yourself in the Charles.

7:05 a.m. – **Bexxxley Hall** – Scholarship. Excellence. Honor. Leadership. Diligence. Fascist indoctrination. These are the ideals our distinguished Fraternal Brotherhood strives to uphold. Which explains the drunk chicks from Simmons. We have cell phones, thus are important. We are Gladiators.

10 a.m.

10:00 a.m. – **Next House** – We'll do as much as it takes to make your Nextual experience phenomenal. Come by and ask for a tour of Next House!

10:30 a.m. – **New House** – What can be better than waking up to a huge home-cooked breakfast? Well you're not at home anymore, but if you come to New House, you'll feel like you are! We're slaving over a hot stove to make you pancakes, french toast, sausages, bacon, and our amazing smoothies!

12 p.m.
